

Voltas wins highest MEP Middle East award for the second year running!

At the 2011 MEP Middle East Awards banquet at Address Marina Hotel, Voltas' Electrical Mechanical Division(EMD) was once again the star of the show.

The Voltas-EMD team walked away with the most prestigious honour, namely 'MEP Contractor of the Year'.

The award was a tribute to Voltas' outstanding MEP work on the landmark Etihad Towers project in Abu Dhabi. Etihad Towers was also adjudged the 'Overall GCC Project of the Year', with Voltas' electro-mechanical works playing a significant role in the victory.

It was a repeat of Voltas' victory at the MEP Awards 2010, as 'MEP Contractor of the Year' for its work on the Ferrari World project (which also won the 'Overall GCC Project of the Year' honours).

As expected, these were fiercely fought contests; and the judges selected Voltas for its sheer ability to undertake large, complex and diverse projects across the region, involving several iconic developments. They were all praise for Voltas' 'exponential growth over the last 10 years' as a prominent player in MEP contracting in the region, and made special mention of its thorough work processes as a key factor behind its success.
