

Voltas wins a large water treatment plant order

Voltas has secured a large order for a water treatment plant in the East Zone.

Located at Palta, Barrackpore (north of Kolkata), the project envisages a 15MGD water treatment plant as well as 0.75MGD capacity UGR-cum-pump station. This project is sanctioned under JNNURM (Jawaharlal Nehru National Urban Renewal Mission) Scheme, and is scheduled for completion in 18 months.

With four prior orders for large sewage treatment plants and the current order for a large water treatment plant in Kolkata, Voltas has convincingly established itself as one of the leading players in the municipal water treatment segment in the East Zone.
